=====

As an Amazon affiliate, I realize it is highly important to promote high converting products with high commissions rate.

Example: baby strollers.

It is a niche keyword that has many products priced above \$100 on Amazon.

Thus the commission is quite good..

.. Not only that, but Baby Strollers is also a niche keyword that sought-after by thousands of people every day; either by soon-to-be mom/dad or people who want to buy it as a gift for their relatives, friends, etc.

A niche keyword like Baby Stroller, is a winning keyword.

And through AzonKeywordLabs, I want to spill some more of those winning keywords to you.

I will spill not just 5 or 6..

.. But over 50+ of winning keywords that feature high-priced, high-conversion products on Amazon.

Here they are below.

How To Utilize Those Winning Keywords:

Simply type one of them inside AzonAllabs:

The screenshot shows the AzonAllabs interface with the following fields and options:

- Product Keyword:** A text input field containing "weighted blankets". A yellow arrow points to this field.
- Amazon Country:** A dropdown menu set to "Amazon US".
- Select AI Engine:** A dropdown menu set to "GPT-4o (Default)".
- Review Content Tone:** A dropdown menu set to "General (default)".
- Review Content Language:** A dropdown menu set to "Default (English)".
- Review Content Length:** A dropdown menu set to "Medium-Length (Default)".

At the bottom of the form is a purple button labeled "Begin Amazon Product Research".

You will get list of Amazon products.

Choose any products you want to monetize and click generate review content for that product.

Now of course you will have to post that content somewhere, right?

So SET your affiliate business strategy:

Will you build one website for each niche keyword?

Or do you prefer to build one big, multi-topic website that can promote several niche keywords?

When I first started Amazon affiliate business, I chose the latter.

Simply because, first: I knew very little about affiliate marketing; and second: that time I didn't have much money to buy 10 domain names all at once.

After several years, I always build one website for one specific keyword/niche.

Why?

Because first: Google tends to rank them higher; and second: they are easier to sell/flip once they generate some results (buyers on Flippa loves niche specific website than mix-niche website)

I'm not saying building one website for one specific keyword/niche is better..

.. Just set your affiliate business strategy according to your preference.

=====

I wish you lots of success in your affiliate business, a good health and a supportive relationship.

Monitor your business, but remember to monitor your health too.

10 years ago I could work online for 10-12 hours every day..

.. Now I'm 37 this year - sitting in front of my laptop for just an hour already makes my hip stiff ;-(

I really wish you can make use of this AzonKeywordLabs.

If you gain some success because of it, keep stepping on the gas pedal, don't put your foot on the brakes pedal at all unless due to a very bad health condition.

Trust me. Once you step on the brake pedal, you'll lose the momentum to level up.

Yes, of course having time with family and friends are important..

.. But your businesses also deserve your energy and attention.

Hope this helps and enjoy!

Cheers,

Leonardus
