

Thank you for using my ChatAzon A.I. WP plugin.

I've coded this plugin so you can chat with A.I. to find the best affiliate products to promote from Amazon.com based on keywords that you submit.

Please follow the user guide before you use the plugin on your website.

Using The Plugin

- Install & activate the plugin on your WP site
- Navigate to Settings menu -> ChatAzon submenu:

- Enter a keyword and click the “Find Products” button

Wait a few seconds, and the plugin will display several Amazon products and shows the score for each product.

The higher the product's score, the better it is to be promoted.

Troubleshooting

Q: When I click the “Find Products” button, the table is empty?

A: If that happens, just try again in 1-2 seconds.

Q: Some product’s price returns 0 value?

A: That happens because Amazon doesn’t return/reveal the current price of the product.

Enjoy using the plugin!

Cheers,

Leo at <https://wpthemeplugin.com/>
